

PLEASE HELP US STOP ABORTION AT THE MEDICAL OFFICE BUILDING

ATTACHED TO THE LEONARD MORSE HOSPITAL

The owner of a chain of abortion clinics in Massachusetts has purchased a condominium office space and is preparing to open and perform abortions up to 20 weeks gestation at the medical office building, apparently without the knowledge or consent of most of the good doctors who practice there.

HERE IS WHAT YOU CAN DO:

Please write to or visit your doctors who practice there, as listed and at the address shown on the reverse side. Let them know how painful it will be for their patients to enter a building where young human lives are being callously destroyed.

Some of our doctors may have the mistaken belief that there is nothing they can now do to correct this deplorable situation. Please remind them that their elected board of directors has the right under their condominium by-laws, to deny admission on the grounds of avoiding a potential public nuisance. They also have a right to protect their livelihood against the potential loss of patients who may find it impossible to continue receiving their healing care in a building that houses a life destroying practice.

Concerned Patients of the Medical Office Building.

"Take my hand, not my life...."
